HUAWEI PUBLIC CLOUD

VODACOM BUSINESS ECS OFFERING

The core Huawei Cloud Services include Compute, Storage, Network. Database, Security, Applications, AI and Enteprise Intelligence Services.

Platform Overview

HYBRID CLOUD SOLUTION

Hybrid use of Huawei Cloud services in local data centers to meet specific security and compliance requirements.

Iterative development provides ever-improving cloud services to address ever-changing service requirements and the need for low-latency in certain scenarios.

SAP ON HUAWEI CLOUD

First Chinese global technology partner of SAP since 2012.

Co-innovation center set up in 2015 to enable multiple innovative solutions including Fusion Cube for SAP HANA, Fusion Sphere for SAP HANA, Huawei SAP HANA Appliance, SAP HANA TDI, IoT, and more.

SAP on Cloud is the best choice for SAP users
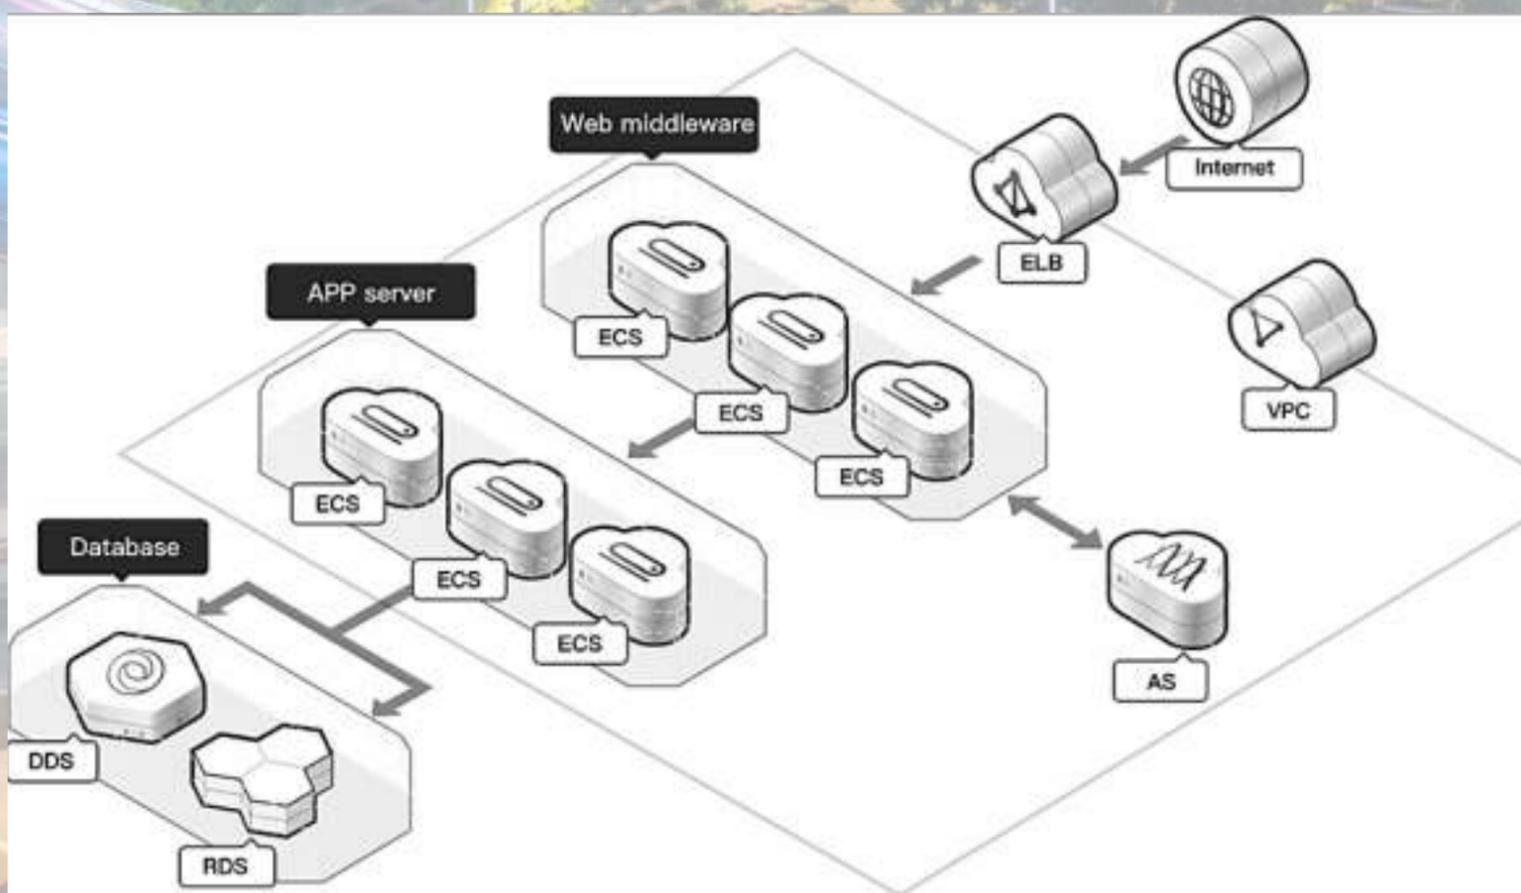

MEDIA AND ENTERTAINMENT

From content production, analysis and processing, to content distribution and business function assistance,

Huawei Cloud provides efficient, intelligent, secure and stable lifecycle service capabilities for the media and entertainment industry.

GAMING

Cloud gamers enjoy a flawless, lag-free gaming experience without downloading apps or updating their devices. Exclusive, innovative software and hardware technologies optimize the Open GL instruction stream to significantly reduce bandwidth consumption.

Why "Huawei Cloud"

1. Scaling services on demand.
2. Provides robust platform reliability for all cloud services.
3. Decouples operations from maintenance.
4. Shares application ecosystem.

Leading technology

Leading full stack AI capabilities.

- Diverse cloud architecture and unparalleled performance.

Future-orientated

- World-class public cloud.

- Open ecosystem that harnesses chip-device-pipe cloud synergy.

Trustworthy

- Reliable and secure data protection.

- Local support. Global access.

Comprehensive

HUAWEI CLOUD Stack is cloud infrastructure on the premises of government and enterprise customers, offering seamless service experience on cloud and on-premises.
